Lab: Shopping List extension

Created by Lasse Jenssen

[Home](#)

Item Shopping List

Task: Add DELETE functionality

- Base the lab on the code in the "demo-04-front-controller-flow.zip" project (see Course Modules overview).
- Add functionality to delete an Item from the Shopping list.
- Hints:
 - You must update the following files:
 - ItemDAO.java
 - ItemDAOMemorySingleton.java
 - FlowManager.java
 - ActionMapper.java
 - shoppinglist.jsp
 - You must create a new Action class (for the delete operation).
 - Extra: Add a verification page before actually deleting Item.
(Note! Reuse the ViewItemAction class for the uri (mapping) for the verification).
